## Requirement

Students are expected to complete all assigned readings before each class session and to remain attentive to current social developments and major issues at both local and global levels. In addition, students should prepare one to two social issues that they personally and continuously follow—one local issue and one global issue, when possible—to support in-class discussion. Such preparation will facilitate more substantive dialogue and peer exchange, and will form the basis for students' individual reflective journals as well as collaborative discussions on feasible youth solidarity action plans.
